

**Klockner-Bartelt**  
**Sarasota, Florida (US Headquarters)**

Since 1997, Thinkpath has been providing Engineering services to Klockner-Bartelt.

**Background**

Klockner, located in Sarasota Florida, is a worldwide leader in the production of packaging machinery. In the late '90s Klockners engineering department was being overwhelmed by lower end engineering tasks that included drafting services.

In 1997, Thinkpath approached Klockner to provide drafting and layout services to enable Klockner's engineering staff to accomplish more "true" engineering tasks. (I.e. design, R&D, project management..)

**Thinkpath Solution**

Thinkpath formed a team of three drafters working out of Thinkpath's Tampa office and a project manager on sight at Klockner's facility to learn and oversee the process and standards of work that Klockner had. Also this project manager channeled and checked the work to the three internal drafters located at Thinkpath's Tampa office.

**Benefits**

By utilizing Thinkpath's proven process, Thinkpath was able to assist Klockner's internal engineering department by completing all of their detail drawing work, therefore freeing up their engineers to complete more important tasks.
